

Heritage Europa

Location photography courtesy of Bishop Burton College

The Europa is our famously elegant horsebox trailer, designed for two lightweight horses. Its practical design means that you can load your horses and tow with ease and safety.

Careful planning ensures that all space on the Europa is maximised, making this a popular trailer. It is highly regarded across the world as a leading horsebox in its category.

If you are looking for a trailer that can easily accommodate two horses of around 16hh with a maximum combined weight of 1320kg, then the Europa is an excellent choice.

Designed to be durable and stand up to regular use, the Europa features a galvanised chassis and framework with a durable aluminium roof and sides, adding up to a trailer that is built to last.

Large opening side windows increase light and visibility for your horses and side vents improve their comfort on the move.
